

DMS Maritime understands the marine environment – its effect on ships, boats and people; the care and maintenance they require over long periods; and the practicalities, trade-offs and realities that are necessary to keeping marine assets fit for purpose and mission.

Maritime training

A Registered Training Organisation, DMS Maritime develops and delivers courses and training needs analyses, conducts assessments and issues statements of attainment. We cover a broad spectrum of competencies and vessels and expose participants to a wide range of conditions and exercises. We deliver customised training under the Australian Quality Training Framework, equipping participants with a solid grounding in maritime regulations and water safety before delivering competency-based, on-water training.

Our commitment

DMS Maritime is committed to delivering superior customer service in an environment of continuous improvement. We innovate, embrace change and always go the extra mile. We deliver on our promises. We operate safely, responsibly and ethically.

DMS Maritime has achieved AS/NZS ISO9001:2000 through Lloyds Register Quality Assurance.

We comply with the International Safety Management Code under the auspices of the Australian Maritime Safety Authority.

We minimise environmental impact to achieve zero environmental incidents. ISO14001 Environmental Accreditation testifies to our commitment to responsible environmental management.

A reputation for exceeding customer expectations

DMS Maritime delivers service efficiencies to customers around Australia, setting the benchmark for maritime service provision.

Who we are

DMS Maritime is part of a skilled international workforce. We accommodate complex maritime project demands anywhere in Australia and the Asia Pacific region.

Our nationwide resources and expertise deliver consistent service standards, optimal efficiencies and cost effectiveness.

Our experienced management, mature business systems and professional teamwork offer comprehensive, industry-leading services to Australia's maritime and offshore sectors.

Our services

At DMS Maritime, we deliver what our customers expect reliability, value for money, attentiveness, flexibility and service excellence.

Fleet operations and management

We operate a fleet of over 550 vessels, comprising our own and customer craft, varying in type and size up to 3,900 tonnes displacement. Our seagoing team includes qualified and experienced personnel, up to Master Class 1 and Engineer Class 1. Our crews are available for outsourced operations and vessel management anywhere in Australia and the Asia Pacific region.

Fleet maintenance and management

Reliable, cost effective vessel availability is essential for our customers' vessels and our own fleet. DMS Maritime delivers optimal vessel performance and serviceability. Our Australia-wide technical network delivers comprehensive in-service support, including refit management, planned maintenance, repairs, test and trials.

Vessel and port services

We offer long-term and ad hoc vessel and port services. Our extensive network ensures prompt responses to customer needs in Australia and throughout the region. Our vessels and crews are available for purposes including:

- security patrols
- marine security barrier maintenance
- maritime events support
- crewing and vessel delivery
- passenger transfers
- harbour towing
- water, fuel and stores lighters
- oil spill response
- cable laying
- offshore support
- maritime recovery services
- training platforms
- providore management
- dockside operations

Our depth of understanding of the maritime environment is matched by the breadth of our expertise and presence.

Integrated logistics management

Competent logistics management is fundamental to effective maritime operations. Our logistics capabilities deliver integrated solutions for planned and emergency procedures. DMS Maritime's integrated systems include warehousing and inventory, supply chain and obsolescence management. Web-based interactive applications give customers online access to job information, invoicing and payment processing.

Marine systems support

We deliver marine, mechanical and electronic systems support and integrated support systems in major ports around Australia. Our nationwide presence delivers responsive defect and deep-level maintenance services, control and monitoring systems.

Vessel build and modification

We work with customers and vessel builders to deliver innovative vessel modification, design and build solutions. Our vessel build and modification expertise responds to a range of specialised industry needs including offshore exploration, salvage, research, deep ocean recovery, cable laying, sea training, sea patrol, border security and rescue.

Maritime project management

Our project management processes meet complex operational requirements. Our expertise is built on 12 years of contract management experience that includes the successful build of Navy's Armidale Class Patrol Boats. Under the Fleet Marine Services Contract, we will manage the construction of vessels ranging in size from 12 to 83 metres.
